Welcome to Wiggle, Sam 🐾

Work smart, play always.

You're on the team. Here's everything you need to get walking.

Your account

- **Email:** `sam@wiggledogwalks.com`
- **Password:** `WiggleSam2026!`
- **Role:** Wiggle Pro (senior walker)
- **Sector:** Plateau
- **Schedule:** Thursday & Friday

Change your password the first time you log in if you want — ask Rod how.

The app

The Wiggle app lives here:

👉 **https://wiggle-app-dusky.vercel.app**

Open that link on your phone. It works in any browser, but you'll want to install it so it lives on your home screen like a real app.

Install on iPhone (Safari)

1. Open the link in **Safari** (not Chrome — Safari only for install).
2. Tap the **Share** button (square with an arrow pointing up).
3. Scroll down and tap **Add to Home Screen**.
4. Name it "Wiggle" and tap **Add**.
5. The 🐾 icon will appear on your home screen. Tap it — it opens full-screen like a real app.

Install on Android (Chrome)

1. Open the link in **Chrome**.
2. Tap the ⋮ menu in the top right.
3. Tap **Install app** (or **Add to Home screen**).

4. Confirm. The 🐾 icon will appear on your home screen.

Logging in

1. Open the app.
2. Enter your email and password (above).
3. You'll land on **Today** — your dogs for the day, grouped by walk.

The app remembers you. You should only need to log in once on your phone.

How the day works

When you arrive at work on Thursday or Friday, Rod and Gen have already organized your groups. You'll see your dogs listed under the groups you're walking, in the order Gen plans them.

Every dog card shows what you need before you knock:

- Dog name
- Address
- Door code (if there is one)

You never have to tap to see those three things. They're always visible.

The two swipes you'll use most

1. Swipe to mark picked up

When you've got the dog on leash and you're leaving the building:

- **Swipe the dog's card from left to right** → the card turns **green** and shows the pickup time.
- That's it. Move to the next dog.

2. Swipe to mark back home

When you've dropped the dog off safely inside:

- **Swipe the card from left to right again** → the card fades and shows both the pickup and return times.
- Done with that dog.

Made a mistake?

- **Swipe the other way (right to left)** → undoes the last action. No panic. Nothing in this app is ever permanent.

Tapping the dog's name

Tap any dog's name and a drawer slides up from the bottom. That drawer has everything you might need mid-walk:

- **Address and door code** (bigger, easier to read)
- **Forever Notes** — permanent info about the dog (allergies, quirks, "always keep on east side of street"). These have a purple name and a ★ icon.
- **Owl Notes** 🦉 — time-sensitive notes from other walkers. "Was reactive on Garnier yesterday — take the quieter route." These expire after a few days.
- **Walk history** — what other walkers wrote about this dog on past walks.

Tap outside the drawer to close it.

If a dog isn't walking today

Sometimes an owner texts Rod or Gen that their dog is skipping a walk. When that happens, the dog will already be marked **not walking** when you open the app — the card turns amber so you know. Don't go to that door.

If *you* get a message mid-walk and need to mark a dog as not walking:

1. Tap the dog's name to open the drawer.
2. Tap **Not walking today**.
3. The card turns amber. The dog stays visible so your count stays right.

Writing a note about a dog

After a walk, if something happened the next walker should know about:

1. Tap the dog's name.
2. Tap ✎ **Note**.

3. Tap one of the quick chips ("Great walk", "Reactive", "Tired today") or type a quick note.
4. If the next walker needs a heads-up, flip the **"Warn next walker"** toggle — your note becomes an **owl note** 🦉 that shows up on the dog's card for the next 3 days.
5. Tap **Send**.

No typing required if you use the chips. No note is ever anonymous — your name is always attached.

The 🚩 flag

If something happened on a walk and you want Rod or Gen to follow up with you later — but you don't want to type it out right now — tap the 🚩 chip in the note composer. It marks the dog as "ask me later." Rod and Gen see it instantly on their end.

The rules that never change

1. **Every dog card always shows name, address, door code.** Even in busy group mode. If you can't see one of those three, something is broken — tell Rod.
2. **Nothing ever disappears.** Picked-up dogs stay green. Not-walking dogs stay amber. Your count always matches reality.
3. **Every action is reversible.** Misswiped? Swipe back. Misread a name? Undo. There is no way to break anything.
4. **Work smart, play always.** 🐾

Your first day checklist

- [ ] Open the link on your phone in Safari (iPhone) or Chrome (Android)
- [ ] Install it to your home screen
- [ ] Log in with the email and password above
- [ ] Confirm you see **Today** with Plateau dogs for Thursday
- [ ] Try tapping a dog's name to see the drawer
- [ ] Try a practice swipe on a test dog (Rod will show you which one)

If something goes wrong

Text Rod. Any time, any reason. No question is too small on your first week.

Welcome to the team. The dogs are going to love you. 🐾

— Rod & Gen
